

Honeycomb Sea Sponge 3.5 - 4"

£5.99

OUT OF STOCK

Quick Overview

After washing, the feeling of cleanliness and freshness is something that simply cannot be matched with any synthetic sponge.

Details

Hydrea's 100% Natural Honeycomb Sea Sponge is gathered from the Mediterranean where the cooler sea temperature, and greater depths create very strong dense sponges. Natural sea sponges are a biodegradable, renewable natural resource. Highly absorbent, creating a gorgeous lather and a texture that only nature can produce. The soft, but textured surface of the real sponge affords gentle care even to the most sensitive skin, at the same time its unique feel provides a deeply cleansed and refreshed result.
