

Dinosaur Skeleton Dig By Spark Science

£7.99

OUT OF STOCK

Quick Overview

SPARK experiment kits award winning Thames and Kosmo make science activities accessible, approachable, fun, fast, easy, and inexpensive.

Details

In this "Spark: Science in a Flash" kit, you cast a dinosaur skeleton into a rock and then excavate the skeleton fossil! Mold a cool dinosaur skeleton into a plaster rock form and then use the included tools to carefully scrape away the plaster. Just scrape away enough plaster to reveal the top half of the skeleton and then you can display your fossil in your room! Learn about how dinosaur fossils formed and why fossilized dinosaurs are found around the world. Great for kids who are interested in dinosaurs, paleontology, and fossils! Includes: Rectangular mixing tray, Stone shaped mold, Excavation tools (2), Measuring spoon, Red plaster, Gray plaster, Dinosaur skeleton figure. Also needed: water and newspaper. For ages 7 and up.
