

Stepping Into Science by Thames & Kosmos

£29.99

OUT OF STOCK

Quick Overview

In our opinion, Thames & Kosmos make the best science kits for children: they are the perfect way to encourage your children to develop a true love of learning.

Details

principles in a thoroughly accessible, colourful, fun and hands-on way. There are 25 experiments to try in five key areas: nature, physics, chemistry, air, and water. The experiments include building a soap-driven boat, watching how seeds grow in different conditions, mixing colours, watching a balloon self-inflate and building a barometer. The brilliant 48-page accompanying booklet not only details the experiments step-by-step but also contains lots of interesting facts and thought-provoking questions. Highly recommended. Builds scientific understanding. Encourages problem-solving skills. Awards Creative Child Magazine Preferred Choice Award Teachers' Choice Award Dimensions: 37 x 29 x 8 cm Manufacturers recommended age: 5+
