Quick Overview

Kefir Chocolate from Naive Lithuania

Details

At Chocolate Naive, one of only 200 such producers worldwide, the production cycle starts with a dried cacao bean. Top class cacao beans are diligently selected from exceptional farms. They are then transported via the old seaways to Europe and, finally, to Lithuania, home of Chocolate Naive. Two key principles are of the most importance to us. First, we only work with the best ingredients in the world. Secondly, we seek to become world-class craftsmen in working with this type of exquisite production. Naive makes chocolate in ways that help to reveal the character of a particular cacao bean. The chocolate is finally born after a meticulous analysis of taste, colour, smell and texture. For some time already our products have put Lithuania on the foodie map as a rising star of gourmet chocolate in the world.
