Details

This is the Gift Basket that just keeps giving, with the ability to get creative and experiment with mini gardens and food products which could be used by themselves or daringly mixed and put together creatively to cook something new; chefs chocolate drops, oats and amino oils equals chocolate oat cookies. Along with a cooking magazine to spark some ideas and provide more recipes for experimentation. Even long after their Birthday, a woman will be able to watch her creations grow with a herb garden, along with a tomato GroTray, to be used in their recipes too. However, as it is for a Birthday, there are gourmet chocolate boxes and a range of sweet treats to try, enjoy and love, we tried to keep the flavours natural and organic, something we believe chefs love, allowing them to be enjoyed together, with no unusual or overly strong flavours. With fun ideas with a cake in a mug, brings a sense of light-heartedness, and something a woman would usually not buy for herself, but why not? It is her Birthday after all.
