Quick Overview

Irish Cheese & Wine Hamper comprises the classic components of a savoury hamper, but made entirely of Irish foods with the exception of the wine. Surely you'll forgive us, given the chances of successfully growing grapes in the Emerald Isle.

Details

What sets this Cheese and wine hamper apart from others in our range and by implication others from all the other hamper companies in the UK is our total reliance on Irish products in this hamper. Three Irish cheeses for a cheese master, this Christmas Hamper is highly sophisticated, and we know a more mature demographic will love this Irish cheesy Christmas Hamper. Complimented by a bottle of wine, which will go down a treat on the table. The chocolates we have chosen are of a more refined taste, with dark chocolate and chocolate brittle, to stay tuned with the purpose of this Hamper, to be opulent and ooze grandeur. With a Christmas pudding to make this Cheese & Wine Hamper have a Christmas theme. Additionally, it isn't Christmas without some chocolate, which is why we include Irish Chocolates Skelligs and also Lily O'Briens, both indulgent in their own right. There are a variety of other items contained within this hamper, which are unlikely to be seen in other cheese and wine hampers simply because they are so expensive. However this is a specialised niche hamper and we wanted the products to be on a different level of aspiration altogether. Jars of fruit chutney and relishes are included to ensure that this Hamper looks professional and finished. We had to make sure that there was everything you could want to enjoy with the cheese and wine. It is an Irish Cheese and Wine hamper, so all of these extras are from irish producers also. More familiar supporting products are the cheeses , which are made in Tipperary & Kerry by Cooleeney and Carrigaline Dairy. Finally of course is our refinement in presentation, packaging and delivery, which is exemplified by our reliance on a linen lined wicker base and stylish branded lid giving that elegant professionalism, which sounds so easy, but takes years of experience to successfully achieve.
