Details

We've always enjoyed making gourmet food hampers, because we take a special interest in what we put into them. That might sound obvious, but it takes a special kind of discipline to maintain a quality threshold for 15 years plus. As the original instigators of fresh food hampers filled with smoked fish and charcuterie produce, we are confident the Artisan Gold Hamper remains ahead of the competition in terms of quality and taste. This not only contains the usual salmon and carved ham we offer, we have included a whole large ham, venison salami, air dried beef and an array of cheeses. This gift certainly focuses on the savoury elements of Christmas, but we have also included a sweet side too. With chocolates and truffles, the recipient will have enough to last them all of Christmas. However, we haven't just gone for quantity, the quality is also premium, with nothing less than the best being included in our Gold range. We have avoided alcohol, as this Gift doesn't need it, it is complete without the addition of alcohol. We also keep in mind that some people don't enjoy the consumption of alcohol and we cater for them too. If you are shopping for someone who loves and appreciates premium food and the finer things in life, then surely the Artisan Gold Hamper is the gift you are looking for this Christmas.
